Our
Services

Steam Carwash

Steam carwash is the latest technology that uses steam instead of water to clean the interior & exterior of the car. This method is very eco-friendly. Because very little water, only about 6 liters is needed to wash a whole car.

Our
Services

Engine Room Cleaning

One of our very important services is Engine Room cleaning / Engine Bay Cleaning. When our car runs for a while, dust and dirt come into the engine room and get cleaned. When the oil content is with this, our engine room gets very dirty. Cleaning such a place is called engine room cleaning. We can do this using our steam system.

Our
Services

Windshield Treatment

This service is used for cleaning the glasses (Windshield) of cars. In normal washing, we can not remove these stains or water spots in the glasses. Which will affect our driving vision . We have our special service which will remove this kind of problems

Our
Services

Car Seat Cleaning / Shampooing

The interior of our car should be kept clean just like we keep our house clean. The most important thing is to keep the seat neat.

Our
Services

Headlight Restoration

We can see that the headlight color of our car is faded or dull. The main reason for this is the oxidation of the headlight material due to UV light, the impact of road debris (stones, sand, etc.) and rain. Headlight / headlamp restoration is the process of bringing the faded headlight back to its natural state.

Our
Services

Interlock Cleaning

We will restore your interlock and get it looking its best with our innovative steam pressure washing system. Whether it's the poolscapes, walkways, patio or driveway, our professional & highly trained crew are experts when it comes to cleaning interlock.

Our
Services

Sofa Cleaning

We provide sofa cleaning services like sanitization, vacuuming, upholstery shampooing, mechanized drying, and our experts use well-mechanized equipment to clean your sofa. We use gentle and eco-friendly products in the sofa cleaning process.

Steam Carwash:

1. Is steam washing healthy for cars?

Yes. 100 % healthy for cars. Using this technology, lakhs of cars cleaned around the globe

2. How many liters of water is required for a steam wash?

We need only 5-6 liters of water for washing a single car. Where in the normal carwash it will take around 150-200 liters of water. This is how we conserve water..

3. How mobile car wash is useful for customers ?

We can come to your place (home, office), which saves you money and time. No need to wait as in the normal washing centers. Your time is your money.

4. Does steam wash can do all the service as in like normal service center

Yes, of course. Apart from that we can do the seat steaming which normally is not available in the service centers. Steaming the seat will kill the bacteria, fungus

5. Why do people say you can kill microorganisms like fungus & bacteria?

Because we are using the steam at the rate of 80 -130 degree Celsius, in this temperature these microorganisms cannot sustain.

6. Can you clean the car that comes with mud in a good way?

Yes, of course . We have two modes in our steam engine.

- Steam mode
- Water mode

If there is lots of mud in the car we can first apply the water mode. Which will clean the mud.

7. If the steam wash is done, won't the electronic parts of the vehicle be compliant?

Our professional experts understand such electronic parts and put them away and steam them in the remaining places. Wipe the electronic parts with a microfiber cloth.

8. Should the customer provide electricity and water?

Mobile steam car wash will arrive at your doorstep with all its accessories and facilities

9. What is the time required for washing a car?

Normally it will be 60-90 min based on the type of car and the dust in the car.

Windshield Treatment:

1. What are the reasons for stains or water spots in the glasses (Windshield)?

The reason for these spots or stains is that the water that falls on the glass of our car evaporates from there and the remaining minerals stick to the glass. This later becomes water spots

Sometimes we use borewell water to wash the car. Such hard waters is another reason for water spot stains in the car.

2. Is there any other reasons to do the windshield treatment for your cars?

Sometimes we have driving vision issues because of the tree sap, bird, droppings etc. There is a possibility of removing such issues in normal wash. But if you can't find a complete solution from normal washing, then please come to us . We have solutions tree sap, watermarks, and other stains from the glass

3. How much time it will take to complete the windshield

FAQ

treatment of car?

Normally it will take 1-2 hours depending on the type of the car. Which will include the front ,side and back glass of the car.

4. How often should you clean your car windshield?

We suggest to do this process at least 2 times per year to keep your visibility at its best.

Engine Room Cleaning?

1. Which are the safety Tips and Precautions need to take while cleaning the engine room

- cover the electrical parts. Our technicians will take care of it
- Don't try to clean the engine when it is hot. Wait for sometime to become it is cool
- Don't Pour Water Over The Sensors Directly

2. How often do you need to clean your engine bay?

We suggested that you clean your engine bay every 3-6 months to keep it clean and well protected.

3. Which are the benefits of engine room cleaning?

Regular engine room cleaning will help to improve your engine performance. It will prevent the rusting of the engine area.

Cleaning the engine helps ensure parts move efficiently, maximizing fuel economy.

Car Seat Cleaning/Shampooing:

1. Which are the situations where our car seat gets dirty?

- When traveling as a family, food should fall out of children's hands.
- Make children vomit.
- Children kick the seat
- Sometimes our pets, pets' hair when we put them in the car.

- Because of our sweat .
- Due to these things, not only the seat gets dirty, but there is a chance of a bad smell coming inside the car as a whole.

2. How seat cleaning is possible in our steam wash system?

Normally we can use the steam in the seat. If more dirt after the steam wash, we can use the seat shampooing in order to remove the additional dirt.

3. Which the different kind of seat that we can wash?

- Nylon Car Upholstery
- Polyester Upholstery
- Vinyl Upholstery
- Faux Leather Upholstery
- Leather Upholstery
- Cloth upholstery

Headlight Restoration:

1. What is the importance of doing headlamp/headlight restoration?

Such dim and discolored headlights make night driving difficult. So it is very necessary to bring it into natural mode using the headlamp/headlight restoration

2. What are the advantages of doing headlamp restoration?

Because headlight restoration enhances the overall look of your vehicle. It also enables clear night vision and increases the safety of our journey.

3. How often do you need to clean your headlight restoration?

We suggested that you clean your engine bay every 3-6 months to keep it clean and well protected.
